# BATTERY INNOVATION DAYS

## 14-15 NOVEMBER 2023

BORDEAUX, FRANCE AND ONLINE

### EXHIBITION OPPORTUNITIES

# About the Battery Innovation Days

Let's talk about Battery Innovation! After two successful editions, the Battery Innovation Days event is finally coming with the third edition, hosted by the Nouvelle Aquitaine region in France and taking place on 14 & 15 November in a hybrid format, in Bordeaux and online.

The Battery Innovation Days event fosters dialogue among the Research community, Policy makers, Industry players and end-users to ensure a constructive feedback loop towards the definition of research and innovation priorities in Europe.

This year BID has moved to Bordeaux, thanks to our host, The Nouvelle-Aquitaine Region. Battery's hold the key to reaching a responsible and sustainable future for Europe. This event will increase visibility and encourage exchange around the deployment of cutting-edge technologies for battery materials, cell design, manufacturing and recycling.

**14-15 November 2023**

**Bordeaux, France and Online**

# The BID Team

Batteries Europe is the technology and innovation platform of the European Battery Alliance (EBA). It aims to accelerate the establishment of a globally competitive European battery industry, driving the implementation of battery-related research and innovation actions.

The BATTERY 2030+ is large-scale research initiative that creates a generic toolbox for transforming the way we develop and design batteries in Europe.

The Batteries European Partnership Association (BEPA) is the international non-profit making association (AISBL) representing the private-side of the BATT4EU Partnership.

IPCEI - Important Project of Common European Interest. It's a transnational project with an important contribution to the growth, employment and competitiveness of the EU industry and economy funded by state aid.
